DEHUMIDIFIER SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING." These words mean:

! DANGER

You can be killed or seriously injured if you don't immediately follow instructions.

! WARNING

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To reduce the risk of fire, electric shock, injury or sickness when using your dehumidifier, follow these basic precautions:

- Plug into a grounded 3 prong outlet.
- Do not remove ground prong.
- Do not use an adapter.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack experience and knowledge, unless they have been given supervision or instruction concerning the use of appliance by a person responsible for their safety.
- Do not use an extension cord.
- Unplug dehumidifier before servicing.
- Do not drink water collected in the water bucket.
- Children should be supervised to ensure that they do not play with the appliance.

SAVE THESE INSTRUCTIONS

State of California Proposition 65 Warnings:

WARNING: This product contains one or more chemicals known to the State of California to cause cancer.

WARNING: This product contains one or more chemicals known to the State of California to cause birth defects or other reproductive harm.

Disposing of the unit:

- When you need to dispose of the unit, consult with your local dealer or local recycling center for information on how to dispose of the unit in an environmentally responsible manner.
- Please recycle or dispose of the packaging material for the product in an environmentally responsible manner.

INSTALLATION REQUIREMENTS

Electrical Requirements—All Models

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

The electrical ratings for your dehumidifier are listed on the model and serial number label. The model and serial number label is located on the right-hand side of the dehumidifier cabinet.

Electrical Requirements

- 115 Volts (103.5 min.-126.5 max.)
- 0-12 amps
- 15-amp time-delay fuse or circuit-breaker
- If there is a “Single Circuit Only” label on the unit, use on a dedicated single-outlet circuit only. If a dedicated single-outlet circuit is not available, then it is the customer’s responsibility to have a single-outlet circuit installed by a qualified electrician.
- If there is no “Single Circuit Only” label on the unit, the unit may be used on any branch circuit of correct voltage and adequate current protection rating.

Recommended Grounding Method

This dehumidifier must be grounded. This dehumidifier is equipped with a power supply cord having a grounded 3 prong plug. To minimize possible shock hazard, the cord must be plugged into a mating, grounded 3 prong outlet, grounded in accordance with all local codes and ordinances. If a mating outlet is not available, it is the customer’s responsibility to have a properly grounded 3 prong outlet installed by a qualified electrical installer. It is also the customer’s responsibility:

- to contact a qualified electrical installer.
- to assure that the electrical installation is adequate and in conformance with National Electrical Code, ANSI/NFPA 70 - latest edition, and all local codes and ordinances.

Copies of the standards listed may be obtained from:

National Fire Protection Association
1 Batterymarch Park
Quincy, MA 02269

Installation Instructions

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install dehumidifier.

Failure to do so can result in back or other injury.

Remove Packaging Materials:

- Handle the dehumidifier gently while unpacking the unit.
- Remove the carton top and lift the dehumidifier from the base pad.
- Remove tape and glue residue from surfaces before turning on the dehumidifier. Rub a small amount of liquid dish soap over the adhesive with your fingers. Wipe with a damp cloth and dry.
- Do not use sharp instruments, rubbing alcohol, flammable fluids, or abrasive cleaners to remove tape or glue. These products can damage the surface of your dehumidifier.
- Dispose of/recycle packaging materials in an appropriate way.

Placement

This dehumidifier may be placed on a stable, level, and solid floor that will support its weight with a full bucket of water. Allow at least 12-18" (30-45 cm) of clearance from walls and furniture. Do not allow the air inlet or outlet to be covered by drapes or curtains, as it will reduce performance.

- Use the dehumidifier in an area where the temperature will not fall below 41° F (5° C). At temperatures below 41° F (5° C), the coils can become covered with frost, resulting in reduced performance.
- Use the dehumidifier in cooking, laundry, bathing, and dishwashing areas that have excessive moisture.
- Use the dehumidifier to prevent moisture damage anywhere books or valuables are stored.
- Use the dehumidifier in a basement to help prevent moisture.
- The dehumidifier must be operated in an enclosed area to be most effective.
- Close all doors, windows, and other outside openings in the room.

Electrical Connection

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

Plug into grounded 3 prong outlet

PARTS AND FEATURES

USING YOUR DEHUMIDIFIER

Turning the Dehumidifier on or off

When you first plug in the dehumidifier, it will beep once and the display will show the current temperature and relative humidity level.

Press POWER to turn the dehumidifier on or off.

IMPORTANT:

- When first operating the dehumidifier, run it in Continuous mode for 24 hours.
- If you turn off the dehumidifier, wait at least 3 minutes before turning it back on.
- Do not try to operate your dehumidifier if the temperature in the room is below 41°F (5°C) or above 95°F (35°C).

NOTE: In the event of a power failure, your dehumidifier will operate at the previous settings when the power is restored.

Using the Timer

Auto Shut-Off

You can set the dehumidifier to shut off automatically after a set amount of time, up to 14 hours.

To set Auto Shut-Off:

1. With the dehumidifier on, press TIMER.
2. Press the Timer button to increase the timer in 2-hour increments (2 hours) up to 14 hours. After 14 hours, press the Timer button again to cancel timing function.
3. After the set time, the dehumidifier will turn off automatically.

Selecting the Fan Speed

The Fan Speed has two settings:

- High Wind (H)
- Low Wind (L)

Press the Wind button until the indicator light for the desired setting is lit.

Bucket Full Indicator

When the water bucket is full of water, the unit will automatically shut off, make a beeping noise, and the Bucket Full Indicator will light up. See the “Emptying the Water Bucket” section for more information.

Automatic Defrost

If the dehumidifier operates for an extended time in low temperatures, ice may form on the cooling coils. If this happens, the dehumidifier compressor will turn off and the fan will run until the accumulated ice has melted. When the coils are completely defrosted, the compressor or fan (depending on the model) will automatically restart and dehumidification will resume.

Selecting the Humidity Level

Press the up or down arrow button to increase or decrease the humidity setting. The relative humidity level can be adjusted between 30% and 80%.

Each press of the button will change the desired room humidity by 5%. The unit will cycle on and off to maintain the humidity level chosen on the digital display.

Emptying the Water Bucket

! WARNING

Sickness Hazard

Do not drink water collected in water bucket.

Doing so can result in sickness.

When the water collection bucket is full, the Water Bucket Full indicator will light and the dehumidifier will turn off. The dehumidifier will not function until the water bucket is emptied and replaced.

When the bucket is removed from the machine, the compressor and fan will both turn off, but the fan will continue to run for a few seconds. This is normal. The dehumidifier will not be removing moisture from the air at this time.

1. Remove water bucket

Remove the water bucket by pulling straight out from the bottom front of the dehumidifier. The bucket features a convenient carry handle for easier transport.

NOTE: Do not place a full bucket on the floor, as the bottom is uneven and the bucket may tip.

2. Empty water bucket

NOTE: Hold the water bucket with both hands when emptying. Empty the water bucket into a sink or drain.

Slide the water bucket back into the dehumidifier.

Continuous Mode and Drain Hose Connection (optional)

The Continuous mode allows the unit to run continuously (depending on the selected humidity level) without having to empty the water bucket.

To drain continuously, attach a hose (not included) for water drainage into a floor drain.

The drain fitting uses a standard garden hose connector. The drain hose must be below the drain port on the back of the dehumidifier to ensure proper drainage.

NOTE: Use a GHT or "garden hose thread", which has an outer diameter of 1¹/₁₆" (27 mm) and a pitch of 11.5 TPI (threads per inch).

1. Remove drain fitting plug

Place the dehumidifier on a level surface. Unscrew the cap on the back of the unit to access the drain fitting.

2. Install drain hose

IMPORTANT: In order to connect the drain hose, you must remove the drain plug from the unit and pull the internal connection pipe out until you hear or feel it click twice.

Thread the drain hose (not included) onto the drain fitting on the dehumidifier. Lead the rest of the hose to a floor drain and cut to length (no longer than 6' [1,82 m] long). Make sure water is draining through the hose and not the bucket and that there are no kinks or knots in the garden hose. Turn on the unit and press the Mode button until set to Continuous mode.

NOTE: The unit will automatically revert back to the drainage bucket if the hose has not been installed properly.

CARE AND CLEANING

Your new dehumidifier is designed to give you many years of dependable service. This section tells you how to clean and care for your dehumidifier properly.

Cleaning the Filter

The filter is removable for easy cleaning. A clean filter helps remove dust, lint, and other particles from the air and is important for best operating efficiency. Check the filter every two weeks to see whether it needs cleaning.

NOTE: For best performance, do not operate the dehumidifier without the filter in place.

Rinse the filter under the faucet. If the filter is very dirty, wash it in warm water with a mild detergent.

NOTE: Do not wash the filter in the dishwasher or use any chemical cleaners; it may damage the filter. Air dry the filter completely before replacing to ensure maximum efficiency.

Remove the filter

Remove the filter from back of the unit by using your thumbs to press down on the tabs directly above the filter.

Reinstalling the filter:

1. Wait until the filter is completely dry.
2. Reinstall the filter in the dehumidifier.

Cleaning the Dehumidifier Cabinet

1. Turn off the dehumidifier.
2. Wipe the dehumidifier cabinet with a soft, damp cloth.
3. Wipe dry with soft cloth.

Cleaning the Water Bucket

The water bucket should be cleaned every few weeks to prevent mold and mildew growth.

1. Remove the water bucket.
2. Wash the bucket with a mixture of warm water and a mild detergent.
3. Rinse well, then reinstall water bucket.

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install dehumidifier.

Failure to do so can result in back or other injury.

Storing the Dehumidifier

If the dehumidifier will not be used for an extended period of time, prepare it for storage with the following steps.

1. Turn off the dehumidifier and unplug it.
2. Empty the bucket.
3. Remove, clean, and reinstall the filter.

TROUBLESHOOTING

Before calling for service, try the suggestions below to see whether you can solve your problem without outside help.

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

PROBLEM	POSSIBLE CAUSES	RECOMMENDED SOLUTIONS
The Dehumidifier Will Not Start	The dehumidifier is unplugged.	Make sure the power supply cord is plugged into a grounded 3 prong outlet. See the “Electrical Requirements” section.
	The fuse is blown/circuit breaker is tripped.	Check the house fuse/circuit breaker box and replace the fuse or reset the breaker. See the “Electrical Requirements” section.
	Power failure	The unit will automatically restart when power is restored. There is a protective time delay (approximately 3 minutes) to prevent tripping of the compressor overload. The unit may not start normal cooling for 3 minutes after it is turned back on.
	The dehumidifier has reached a set humidity level or the bucket is full.	The dehumidifier automatically turns off when either condition occurs. Change to a lower humidity level or empty the water bucket and replace properly.
	The bucket is not in the proper position.	Securely seat the bucket in place.
The Dehumidifier Is Not Drying the Air As It Should	Airflow is restricted.	Make sure there are no curtains, blinds, or furniture blocking the front of the dehumidifier.
	The temperature control is not set correctly.	Lower the set thermostat temperature.
	The humidity control may be set too high.	For drier air, press the down arrow button to lower the percent humidity desired in the room, or set the dehumidifier to CO for maximum dehumidification.
	The room is too cool.	Moisture removal works best at higher room temperatures. Lower room temperatures will reduce the moisture removal rate. Your dehumidifier is designed to operate at temperatures above 41° F (5° C).
	Doors and windows are not closed tightly.	Check that all doors, windows, and other openings are securely closed.
	A clothes dryer or other appliance is generating more moisture than the dehumidifier can remove from the air.	Be sure that the clothes dryer or other appliance is vented to the outdoors, or turn it off during periods of high humidity.
	The dehumidifier has just been installed.	When first installed, allow at least 24 hours to reach the desired dryness.
The Dehumidifier Runs Too Much	The area to be dehumidified is too large.	The capacity of your dehumidifier may not be adequate for the room size.
	Doors and windows are open.	Close all doors and windows to the outside.

Frost Appears On the Coils	The dehumidifier has recently been turned on or the room temperature is below 41° F (5° C).	This is normal. Frost will usually disappear within 60 minutes.
Controls Cannot Be Set	The compressor will turn off and the fan will automatically continue to run for approximately 3 minutes at a fixed setting.	This is normal. Wait approximately 3 minutes and set the fan speed at the desired level.
	Air is moving through the unit.	This is normal.
There Is Water On the Floor	Hose connection may be loose.	Check the hose connection and make sure it is tight. See the “Continuous Mode and Drain Hose Connection” section for more information.
	Hose is attached but not draining.	Make sure the hose is placed so that the water will flow into a drain. See the “Continuous Mode and Drain Hose Connection” section for more information.
E1, E2, or E3 In Display	Your dehumidifier is showing an error code.	Contact XLS for assistance.

ASSISTANCE OR SERVICE

Before calling for assistance or service, please check “Troubleshooting.” It may save you the cost of a service call. If you still need help, follow the instructions below.

When calling, please know the purchase date and the complete model and serial number of your appliance. This information will help us to better respond to your request.

In the USA

Call XLS Products Customer Service toll free at 1-800-207-1156.

Our consultants provide assistance with:

- Features and specifications on our full line of appliances.
- Installation information.
- Use and maintenance procedures.
- Accessory and repair parts.
- Specialized customer assistance.
- Referrals to local dealers, repair parts distributors and service companies. XLS Products designated service technicians are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States.

For further assistance:

If you need further assistance, you can write to XLS Products with any questions or concerns at

XLS Products, Inc.
Customer Service
P.O. Box 16262
Philadelphia, PA 19114-0262

Please include a daytime phone number in your correspondence.

AMERICA'S REMANUFACTURING COMPANY 90-DAY LIMITED WARRANTY

Return the product to the retail location where it was purchased. A new or reconditioned unit will be provided. The exchange unit is warranted for the remainder of your product's original warranty period.

If you have problems returning the product to the store from which it was purchased, contact ARC Customer Service via email at warranty@arcaugusta.com or support@arcaugusta.com. You should attempt to return the unit prior to emailing the email address above.

Products remanufactured by America's Remanufacturing Company have a ninety-day limited "return to vendor" (RTV) warranty. This product is warranted against failure due to a defect in materials or workmanship for a period of ninety days from the date of original purchase. Proof of the original purchase date is needed to make a warranty claim. We recommend you register your purchase by visiting <https://www.arcaugusta.com/register-my-product.htm>.

This warranty is extended to the original purchaser owner only for products purchased for home use within the USA. Should a defect occur, the ARC will repair or, at its option, replace defective unit/parts with new or rebuilt materials without charge for either parts or labor.

Returning Your Unit to ARC:

1. Properly pack your unit. We recommend using the original carton and packing materials.
2. Include in the package a copy of the sales receipt or other evidence of date of original purchase. Print your name and address and a description of the defect.
3. Write the RMA number provided on the outside of the package.
4. Ship to the address provided by ARC.

What Your Warranty Does Not Cover:

- Improper installation.
- Failure of the product if it is abused, misused, or used for other than the intended purpose or used commercially.
- Products with original serial numbers that have been removed, altered or cannot be readily determined.
- Rust on the interior or exterior of the unit.
- Replacement of house fuses or resetting of circuit breakers.
- Damage to the product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage to personal property caused by possible defects with this appliance.
- Costs for removal and or installation of the unit for repair
- Cosmetic defects.

Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.

Exclusion of implied warranties: Except where prohibited or restricted by law, there are no warranties, whether express, oral or statutory which extend beyond the description on the face hereof, including specifically the implied warranties of merchantability or fitness for a particular purpose.

REMANUFACTURING . REDEFINED.
