Warranty

One (1) Year Warranty

1. Ultimate Cooking Versatility

The first kitchen appliance to combine an air fryer, convection oven, microwave and toaster oven in one device for 4 Appliances in 1.

2. TotalFry 360™ Technology

Air fry with little or no oil for healthier, crunchy fried favorites like chicken, shrimp, wings, and French fries. The easy-clean air fry kit provides more frying surface area with better air circulation compared to traditional air fryers. TotalFry 360 does not use microwaves but uses the built-in heating elements.

3. True Convection

Heated air circulates throughout the oven as food spins 360°, cooking your food faster and more evenly without hot spots. You can even broil and bake foods with direct heat, such as fish, chicken and fresh, oven-baked goods.

4. Sensor Cook and Sensor Reheat

A built-in humidity sensor ensures that your food is never under- or overcooked. For precooked dishes, Sensor Reheat stops automatically when food is hot and ready to eat.

5. Patented Inverter Technology

Unlike traditional microwave heating systems that pulse on and off, the inverter creates continuous, constant, even heat to maintain exacting temperature during the cooking process.

6. Perfect Toast, Every Time

Toast your favorite bread, bagels and rolls to golden-brown perfection - no need for a stand-alone toaster oven.
